

The background of the slide is a photograph of two women in a professional setting. On the left, a woman with dark hair, wearing a grey blazer over a black top, is looking down at a large, open, light-brown cardboard folder. On the right, an older woman with short grey hair, wearing a white short-sleeved button-down shirt and grey trousers, is also looking at the folder. They appear to be in a collaborative discussion. The background is a blurred office interior with large windows.

# **IS YOUR FACILITY AUDIT-READY?**

**Safe Patient Handling Assessment**  
Comparing your program against OSHA standards

A person in a white lab coat is holding a tablet. The tablet screen displays a safety compliance dashboard with various metrics and a 'Save' button. The background is a blurred outdoor scene with greenery.

Knowing if you're 100% compliant can be a challenge. We can help with our facility-wide technology-based assessment.

## Safety and Compliance

Following the guidelines of the Occupational Safety and Health Administration (OSHA) helps facilities—

### **Prevent injuries**

Manual lifting, repositioning and transferring can result in patient falls and staff musculoskeletal disorders (MSDs).

### **Reduce costs**

Injuries can lead to workers' compensation claims, medical charges, increased staff turnover, and more.

### **Avoid penalties**

OSHA can impose heavy fines for noncompliance to its Safe Patient Handling guidelines.

# Safe Patient Handling Assessment

## Hard Data for Informed Decisions

Know your level of compliance and find proactive ways to meet industry requirements with a Safe Patient Handling Assessment.

All with minimal disruption, no paperwork and **no cost to you.**

## How it works

For each floor or unit, your Medline representative reviews your protocols and training for the following:

- ✓ Hazard identification and removal
- ✓ Injury reports
- ✓ Patient transfers and repositioning
- ✓ Determining patient mobility
- ✓ Selection and use of equipment

We summarize your current patient population—bariatric, partially or non-weight bearing, dependent or independent, etc.—and the condition of all your Safe Patient Handling equipment.

You receive a concise report, including recommendations for any needed improvements.

# Safe Patient Handling Program

## We have your backs

In addition to the Assessment, we offer a complete Safe Patient Handling Program. Our in-service videos, competency checklists, equipment performance evaluations, and much more, help you comply with Safe Patient Handling regulations. The program is available **at no cost to you** with the purchase of a lift.

Medline is your partner for complete Safe Patient Handling products and solutions.

To schedule your FREE assessment, contact your Medline Representative today.
