MEDLINE Uplift®

Safe Mobility Solutions

Safe Patient Handling and Falls Management Catalog

Stay in sync with upcoming ANA recommendations.

The power of Uplift

Uplift is our breakthrough program designed to help protect patients and clinicians. It mirrors the American Nurses Association (ANA) safe patient handling and mobility (SPHM) guidelines to integrate safe patient handling, falls management and early mobility into one united initiative. Inside this catalog, you will find a wide array of products that support the Uplift program and your patient mobility goals.
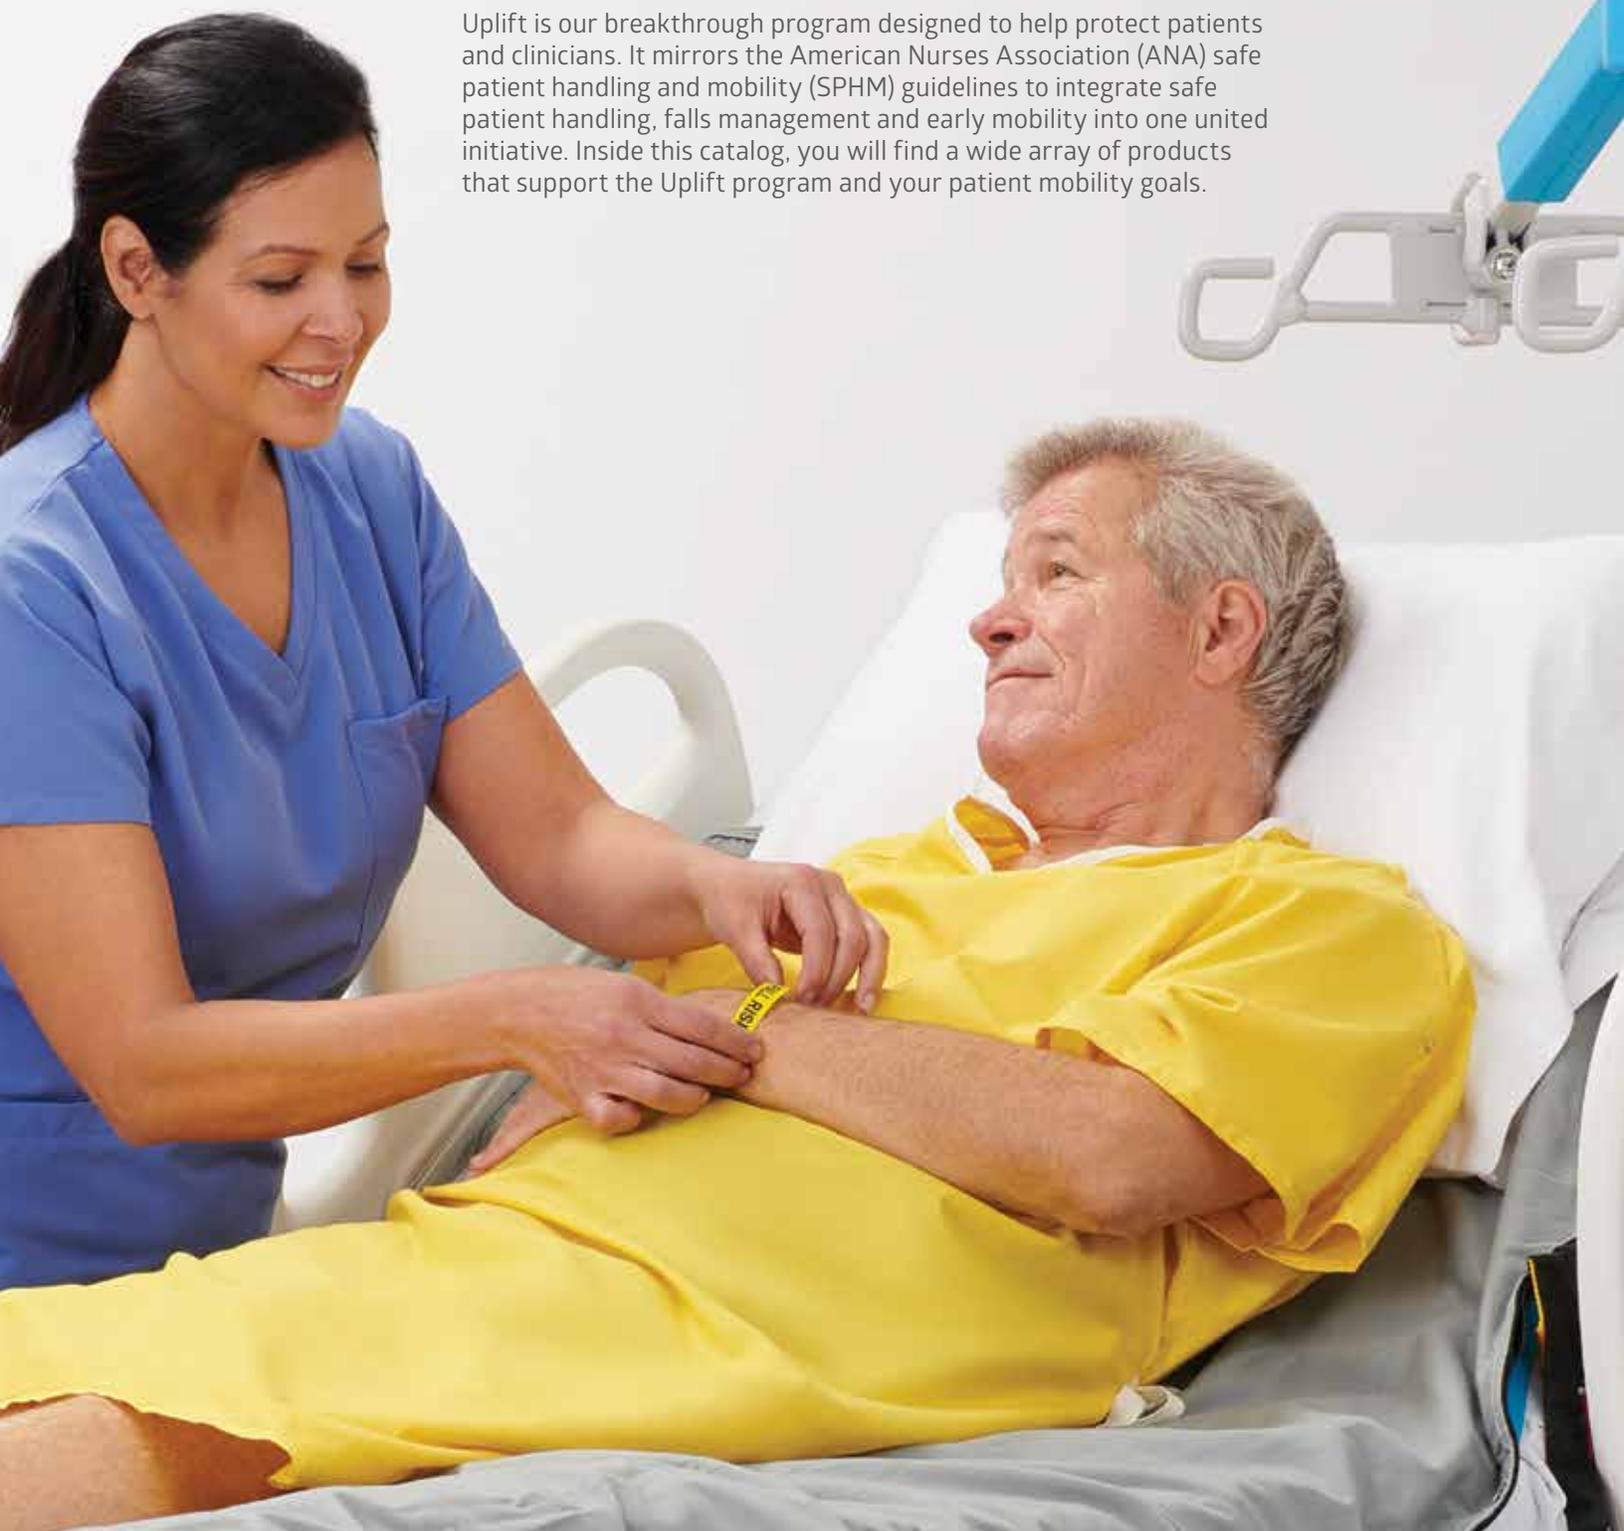

Table of Contents

Products that count as qualifying spend for the Uplift Program

Products that do not qualify for the Uplift Program

MEDLINE Uplift®
Safe Mobility Solutions

Make a move to help protect both patients and caregivers with safe mobility.

The challenge

Until now, there's been no single program to address the integrated facets of safe patient handling and falls management to promote patient and caregiver safety through early mobility.

Mobility-related injuries drive up costs on both ends of the spectrum.

Patients

1M

An estimated 700,000 to 1 million hospital patients fall each year.[1]

$57K

The average cost of treating a patient with Ventilator Acquired Pneumonia.[2]

$40K

Added cost for a pressure injury.[3]

$9,600

Added cost for readmission.[4]

Caregivers

#1 HIGHEST INJURY RATES

Caregivers suffer the highest musculoskeletal injury rates, resulting in the most lost work days of any profession.[5]

$37,000

The average back injury claim.[6]

20%

Nurses who leave direct patient care positions due to risks associated with work.[7]

The solution

Uplift your team with safe mobility made simple.

Introducing Uplift, the first integrated solution designed to keep caregivers and patients safe through every stage of progressive mobility in one easy-to-implement program.

Safe Patient Handling

Falls Management

Early Mobility

Every aspect of safe mobility is interconnected, so we treat them as a single holistic solution.

Uplift covers all three stages of progressive mobility:

Boosting and repositioning

Sitting to standing

Walking

We customize the program for your facility in three easy steps.

1. Discovery Assessment

We understand that every facility is different. That's why we conduct discovery assessments to understand your unique challenges and opportunities from every angle.

2. Custom Recommendations

Based on those findings, we develop a solution that works for you, from policy reviews to environmental changes to product recommendations. No two plans are alike.
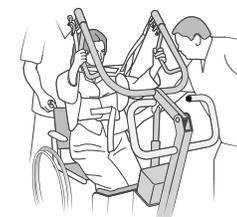

3. Implementation

We make the transition to Uplift simple and seamless with practical tools that get everybody on board. A comprehensive onboarding kit, onsite clinical training and ongoing education help promote a culture of safety.

Ask your Medline Representative how you can qualify for the Uplift program.

The Comfort Glide® Solution

Take the pain out of repositioning.

Comfort Glide repositioning products work together to ease the stress of turning on both caregivers and patients. These include repositioning sheets, wedges, drypads, and fitted sheets.

Comfort Glide Repositioning Sheets, Single-Patient Use

- Low-friction nylon bottom surface requires 35% less effort than a draw sheet to initiate and maintain sliding[8]
- Multiple handles help optimize weight distribution and leverage
- Air-permeable materials allow the sheet to remain under the patient for an extended period of time and are always available to aid repositioning[8]
- Soft, breathable microfiber covers the entire top surface for patient comfort and is compatible with low air-loss mattresses[8]
- Optional retention straps anchor the sheet to the bed
- Safety rated for up to 575-lbs.; bariatric sheet rated to 1,000-lbs.

78" X-Large Length

55" Standard Length

MDSC40018

MDSC40018

Two products in one

Premium glide sheet

Sling for patient lifts
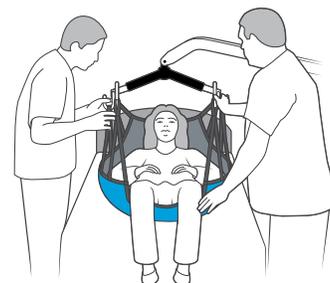

Item No.	Description	Size	Pkg.
MDSC40018	Patent-Pending 2-in-1 Repositioning Sheet and Sling, Disposable, 1,000-lbs. Weight Capacity	42 x 78"	12/cs
MDSC40017	Patent-Pending 2-in-1 Repositioning Sheet and Sling, Disposable, 1,000-lbs Weight Capacity	42 x 65"	12/cs

Comfort Glide Air

Inflatable repositioning and transfer sheet gives caregivers a safe and physically easy way to move patients.

- Cushion of air to help transfer and reposition patients without lifting
- Easy access handles allow for ergonomic grip and repositioning
- Wider size helps optimize leverage
- Air-permeable so it can remain under patients to aid repositioning
- Requires 80% less effort than a standard draw sheet to move a patient[8]
- Safety rated for patients up to 1,000-lbs.[8]

Item No.	Description	Pkg.
MSC60011	Comfort Glide Air Inflatable Sheet	12/cs
MSC60090	Comfort Glide Air Blower	1/ea
MSC60099	Comfort Glide Air Cart	1/ea

Requires up to 80% less effort than a standard draw sheet to move a patient[8]

Cradles the head and neck

Uses a cushion of air to help transfer and reposition patients without lifting

Wider size helps optimize leverage

Drypad placement lines ensure drypad is positioned properly under patient

Easy-access handles allow several caregivers to assist in the move

Air-permeable so it can remain under patients to aid repositioning

Extended handles to aid in lateral transfers

Convenient cart for the air blower

Safety rated for patients up to 1,000 pounds[8]

CGLIDEBASE36

Comfort Glide Fitted Sheets

Low-friction, breathable polyester fabric to help reduce the effort to slide a patient.

- Contoured elastic perimeter hugs the mattress for a close fit without awkward buckles
- Compatible with low air-loss mattresses
- Can be laundered up to 50 times
- Available in four different sizes to fit a wide range of mattresses

Item No.	Description	Pkg.
CGLIDEBASE36	Fitted Base Sheet, 36 x 80", Blue	12/cs
CGLIDEBASE42	Fitted Base Sheet, 42 x 80", Purple	12/cs
CGLIDEBASE50	Fitted Base Sheet, 50 x 80", Black	12/cs
CGLIDEBASE54	Fitted Base Sheet, 54 x 80", Black	12/cs

Comfort Glide Foam Wedges

High-density foam helps keep patients in the recommended 30° tilt position, reducing pressure on bony prominences.

- Non-slip base grips the surface of any mattress or linen
- "Down" arrows ensure proper placement
- Soft, composite fabric covering can be wiped clean
- Holds patients in a 30-degree tilt position
- High density foam doesn't bottom out

MSC50023

Item No.	Description	Pkg.
MSC50023	30° Foam Wedges, Non-Slip Base: 11 x 5 x 16"	2/pk, 6/pk/cs
MSC50024	30° Foam Wedges, Non-Slip Base: 15 x 6½ x 16"	2/pk, 2/pk/cs
MSC50025A	30° Foam Wedges, Non-Slip Base: 24 x 12 x 7"	2/cs
MSC50070	15° Foam Wedges, Non-Slip Base: 16 x 11 x 3"	2/pk, 6 pk/cs

57" Standard Length
CGLIDEPAD

Comfort Glide Drypads

These ultra-absorbent level drypads are designed to manage moisture over an extended period of time and keep patients 26 times drier than the leading competitor.[8]

- Draws in moisture, locks it away from skin and feels dry to the touch within minutes [8]
- Air-permeable for optimal patient comfort and zero strikethrough [8]
- Compatible with low air-loss mattresses [8]
- Sizes designed to completely cover the repositioning sheets

Item No.	Description	Pkg.
CGLIDEPAD	Drypads, 36 x 57"	5/bg, 60/cs
CGLIDEPADXL	X-Large Drypads, 40 x 80"	5/bg, 40/cs

Disposable Slide Sheets

Makes lateral transfers and patient repositioning easier.

- Variety of styles to support your facility's repositioning and lateral transfer protocols
- Single use designs are available when you need them and avoid infection risk
- Convenient storage options available, including wall mounted holder

Item No.	Description	Pkg.
MDSSLIDE5848	Disposable Slide Sheet, Tube, 58 x 48"	50/cs
MDSSLIDEWALL	Optional Wall Holder for MDSSLIDE5848	1/ea
MDSMEDSLIDE	Disposable Slide Sheet, Tube, 33 x 39"	60/cs
MDS30180	Disposable Slide Sheet, Tube, 28 x 28"	30/ea

MDSSLIDE5848

MDSSLIDEWALL

MDSMEDSLIDE

MDS30180

Comfort Glide Lateral Transfer

Comfort Glide LT provides caregivers with a safe and easy way to laterally transfer patients of all sizes from one surface to the next by raising the patient in one smooth motion on a cushion of air, without the need for lifting. The reduced exertion helps lower the risk of injury and requires less manpower to complete a move. The pre-printed surface instructions makes the process easy and the breathable fabric helps prevent shear and friction forces on the patient's skin, for a simple and comfortable transfer experience.

Supports the head and neck

Air-permeable so it can remain under patients to aid in lateral transfers

Easy-access handles allow several caregivers to assist in the move

Convenient cart for the air blower

Extended handles to aid in lateral transfers

Uses a cushion of air for **two-way transfers,** without lifting

56%
Reduction in injury risk
following safe patient handling and mobilization program implementation in 44 intervention sites.[9]

75%
Reduction in effort
compared to standard of care.[8]

Standard	**Bariatric**	**Narrow**	**Half Length**

MSC60042

Standard transfer of any patient.

MSC600LTXL

Transfer larger patient to a specialty bed.

MSC600LT34

Transfer any patient to a more narrow surface.

MSC634LTHF

For transfers wherever the bed/table can drop off.

80" 40"

80" 52"

80" 34"

46" 34"

- Comfort Glide LT supports the body for comfort during transfer
- Sheet can remain under the patient throughout their hospital stay
- Perimeter and extended handles allow multiple caregivers to assist with the move
- Helps reduce effort by 75% compared to standard of care[8]

Less effort means less risk

Patient Lifts

Elevate patient and caregiver safety.

The Association of Safe Patient Handling Professionals (ASPHP) recommends one mobile lift for every eight patients who need one. Our lifts can help you reduce risks of caregiver injuries and lift patients with exceptional safety, convenience and dependability.

Overhead Lift System

This system makes it simple to own and install overhead lifts in almost any facility.

- Single-motor has a weight capacity of up to 600-lbs., or two motors can be combined with reinforced track to handle up to 1,000-lbs.
- Auto-locking cradle design guarantees that slings stay secured to the cradle during lifting
- Track lengths may be trimmed to any room size that is 7 meters or less
- Industry-leading 3-year warranty on the lift motor

Motor Components

Item No.	Description	Pkg.
ERGLUNA	600-lbs. Capacity Overhead Lift Motor	1/ea
ERGHANDCTRL	Hand Control Pendant for Overhead Lift	1/ea
ERGSPREADER	Spreader Bar for Overhead Lift	1/ea

Mobile Lifts

Easy-to-use and reliable mobile lifts designed for all essential clinical tasks including patient transfers and repositioning.

- Emergency release provides for smooth lowering in case the battery dies unexpectedly.
- State-of-the-art control panel displays battery charge level and more
- Removable battery pack reduces downtime with off-board charging
- Can be lowered to floor height for lifting a patient who has fallen
- Compatible with lift scales for convenient weighing of patients
- Six-point cradle for maximum flexibility and safety
- Warranty: three years on all mechanical and electrical parts, one year on the battery

MDS700EL
(Shown with optional gait training arms)

Medline Mobile Patient Lifts

Item No.	Description	Pkg.

MDS700ARMS	Gait Training Arms Accessory for MDS700EL	1/ea

Medline Manual Patient Lift Cradle

Enables caregivers to position patients with one hand, providing better control and helping prevent injuries.

- Helps to eliminate grabbing and pulling
- Improves patient confidence
- Makes the caregiver's job easier
- Compatible with Medline mobile patient lifts MDS450EL and MDS700EL

Item No.	Description	Pkg.
MDS700MCRD	Patient Lift Cradle (Use with Clip Slings)	1/ea

Hoyer® Lifts

Feature-rich total lifts with lightweight aluminum frames
from the trusted Hoyer® brand of lifting products.

JRN500PELSLB

Hoyer® Presence® Patient Lift

- Intuitive push pad assists with initiating movement
- Smart monitor technology drives user compliance and lift longevity
- Lightweight aluminum construction
- Low leg option kit for the Hoyer Presence lift is designed to fit under beds, stretchers, and other furnishings with low clearance

Item No.	Description	Weight Capacity	Pkg.
JRN500PELLB	Lift, Presence, Low Base, Electric	500-lbs.	1/ea
JRN500PELSLB	Lift, Presence, Low Base, Electric with Scale	500-lbs.	1/ea

JRN500SELS

Hoyer® Stature® Patient Lift

- Intuitive Push Pad assists with initiating movement
- Swan Neck style legs allow Stature to get closer to the resident
- True Vertical Lifting
- Lightweight aluminum construction
- Powered clip style positioning cradle (optional)

Item No.	Description	Weight Capacity	Pkg.
JRN500SEL	Lift, Stature, Electric	500-lbs.	1/ea
JRN500SELS	Lift, Stature, Electric with Scale	500-lbs.	1/ea

Stand Assist Lifts

For transferring activities with patients who have some ability to bear weight. Or to provide support for patients to stand and practice bearing weight.
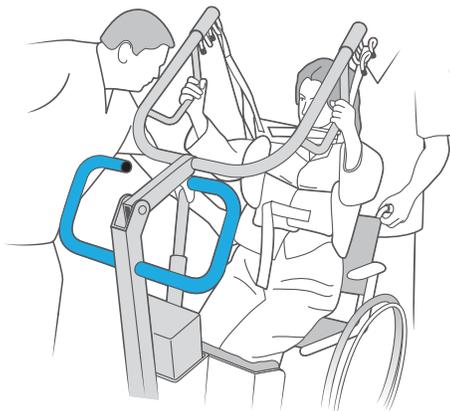

Medline Electric Stand Assist Lift

- Adjustable knee pad for finding the perfect fit for anyone
- State-of-the-art control panel displays battery charge level and more
- Removable battery pack reduces downtime with off-board charging
- Warranty: three years on all mechanical and electrical parts, one year on the battery

Item No.	Description	Pkg.
MDS500SA	500-lbs. Capacity Stand Assist with Powered Base	1/ea

Hoyer® Stand Assist Lift

Stand assist with integrated scale.
- Built-in scale to seamlessly weigh patients during transport
- Intuitive Push Pad assists with initiating movement
- Smart Monitor technology drives user compliance and lift longevity
- One hand adjustable kneepad with infinite settings
- Angled, removable foot tray

Item No.	Description	Weight Capacity	Pkg.
JRN440SAS	With Scale	440-lbs.	1/ea

Service plans for extra confidence

Keep patients and caregivers safe while protecting your facility from costly last-minute repairs with your choice of two service plans:

- **Preventive Maintenance Plan**—full inspection and lubrication of moving parts to ensure proper lift operation

- **Full-Service Plan**—all the advantages of the Preventive Maintenance Plan, plus unlimited troubleshooting and repair hours—ideal for equipment that's past warranty

Raizer® Mobile Lifting Chair

Now there's a better way to lift someone after a fall.

This sleek, innovative, battery-operated chair enables one assistant to safely raise a large adult to a sitting or standing position in just a few minutes.

Raizer Mobile Lifting Chair for Safe Patient Handling by LiftUp

- Easy to carry—Two handy bags hold seven lightweight components
- Simple setup—Color-coding guides the placement of components, and a loud click confirms each connection
- Gentle on caregiver—Requires virtually no physical effort besides a supportive hand
- Fast—In minutes, one assistant can set up and raise a large adult from the floor to a standing position
- Easy to clean—Cleaning's a snap with the smooth surfaces on all Raizer components

Item No.	Description	Pkg.
MDSRAIZER	Raizer Mobile Lifting Chair	1/ea

Mechanically lift using the console buttons or remote control

Patients are lifted safely and comfortably from the floor in minutes

Powerful rechargeable battery provides up to 40 lifts on one charge

Small footprint fits in tight spaces

Add this innovative chair to your safe patient handling program and prevent patient and staff injuries.

All in 4 easy steps:

1 Place the seat motor under the person's knees

2 Attach components to the seat motor

3 Mechanically lift the patient using the console buttons or remote control

4 Transfer the patient to a walker or wheelchair

Color-coding makes setup simple

Two handy carrying bags hold seven lightweight components

Technical Specifications

Weight Capacity	330-lb.
Lifting Time	20–30 secs.
Product Weight:	28-lb. total
Charger	Two pieces: Soniel 12v, 100–240V 12V car adapter
Number of lifts on a full charge	40 at maximum weight capacity
Charging Time	6 hours

Lifting Shower Chair

Make bathroom tasks easier, more efficient and safer for the caregiver.

Use with a bedpan or over a toilet

Easily tilt backward for feet access

Adjust height and tilt with simple controls

Reflex Shower Chair

This lifting shower chair is designed with OSHA requirements in mind to help you reduce staff risks. Plus, working at the optimal height makes bathing tasks easier, faster and more efficient.

- Smooth, energy efficient electric height and tilt adjustments
- Intuitive, easy-to-use control console
- Multifunctional for showering and toileting
- Comfortable foam padding and adjustable headrest
- Arms lock down for safety or fold away for easier transfers

Item No.	Description	Pkg.
MDSREFLEX	300-lbs. Capacity Shower Chair Lift	1/ea

Patient Slings

Choose the right slings for the right task in the right fabric

U-Shaped Patient Slings

Medline's U-shaped patient lift slings are designed for comfort, versatility, and ease of application. The underbody crossing design helps distribute weight, keeping the patient comfortable. This style of sling is easier to get underneath patients, particularly if they are in a seated position.

Sling Materials

Choose the right slings for the right task in the right fabric.

Polypropylene

Non-launderable polypropylene slings are designed for single-patient use. The right choice for facilities concerned about slings not returning from the laundry, it has the reliable strength for high weight capacities.

Knitted

This fabric has just the right amount of "give" for a secure, comfortable and easy fit. But don't let it fool you. This heavy-duty choice is designed to withstand high weight capacities and rigorous healthcare use.

Textured Grip

Strong and flexible, soft to the touch, neoprene adds advanced functionality to a standard sling.

Polyester Mesh

Ultra-strong and soft to the touch. The synthetic material retains its brilliant color, wash after wash. Skillful workmanship and reinforced stitching support high weight capacities.

Hybrid Microfiber Nylon

Soft, breathable microfiber top and smooth nylon bottom. The skin-friendly, breathable material can remain in bed with the patient throughout their length of stay (single-patient use).

Spacer

Warp-knitted polyester "spacer" fabric redistributes pressure and reduces shear to protect skin, while it is also breathable and comfortable. This material is reusable and can be left under patients.

Padded Flannel

Soft flannel provides a secure and easy fit as comfortable as your favorite shirt. Yet strong enough to support patients up to 450-lb.

Synthetic Polyester

Strong and durable, it supports high weight capacities and retains its color longer than traditional reusable fabrics.

Patient Alarms

Handle high-risk patients with care.

Support patients safely and securely with high-quality products at a great value.

MDT8510T

Tamper-Resistant Nurse Mode Alarms

• Alarm alerts staff when patient gets out of bed or chair
• Affordable monitor for use with most bed or chair sensor pads and floor mats
• Alarm and low battery lights communicate functionality, so you're always powered up
• Auto-sensing technology monitors patient movement and triggers the alarm

Sensable® Care Proactive Patient Monitoring System

The only clinically proven technology available that can reduce bed falls and alarm fatigue.

A. Sensor Pad

Lightweight, thin, reusable pad is inserted into the fitted sheet to monitor patient movement from the shoulders to the thighs, detect potential bed exits, and reduce bed falls. It also issues repositioning alerts.

B. Alarm Monitor

When there's an unscheduled bed exit attempt, this bedside device flashes red, issues an audible message to remind the patient to wait for caregiver, and alerts staff.

C–D. Dashboard and Computer Server

Placed at the nursing station, the nursing dashboard receives real time data from the alarm monitor and can simultaneously monitor up to 35 beds in real time. The computer server collects data from sensors and devices to generate unit-specific reports.

E. Customizable Fitted Sheet

Poly sheet accommodates the sensor pad and is customized to your bed size.

Free Mobile Device App

Nurses receive potential bed exit alerts and notifications to reposition patients via the free Sensable Care App available for Apple iOS® and Android™ devices.

Sensable Care Monitoring System

- Enhance patient safety and security with Sensable Care, a state-of-the art monitoring system that detects early patient movement patterns and alerts staff prior to a potential bed exit

Repositioning Belts

- Ideal for patients with minimal upper trunk control who require positioning support and are at risk of falling, or those who require a restraint for medical treatment
- For use on a bed, stretcher or chair, wheelchair
- For combative patients, utilize keylock restraints for maximum security
- Flame-retardant cotton wraparound belt has a secure hook-and-loop closure
- Roll belts are less restrictive in that they allow patients to sit up or roll from side to side in bed
