

Innovation is at the core of Go Go® Travel Mobility. Our team is constantly striving to improve the user experience by designing scooters that are comfortable, functional, and high performing, so your customers can enjoy all the moments that matter.

With that, Pride Mobility® is thrilled to introduce two exciting new additions to the next generation of Go Go® Travel Mobility: the Go Go Elite Traveller® Gen 3 and the Go Go Elite Traveller® Gen 3 Platinum. Together, these two new models represent our most sophisticated travel scooters to date, giving your customers more choice while delivering the comfort, convenience, and performance they expect from Go Go.

THE NEXT GENERATION OF GO GO®

Shown in Cardinal Red (standard)

FDA Class II Medical Device

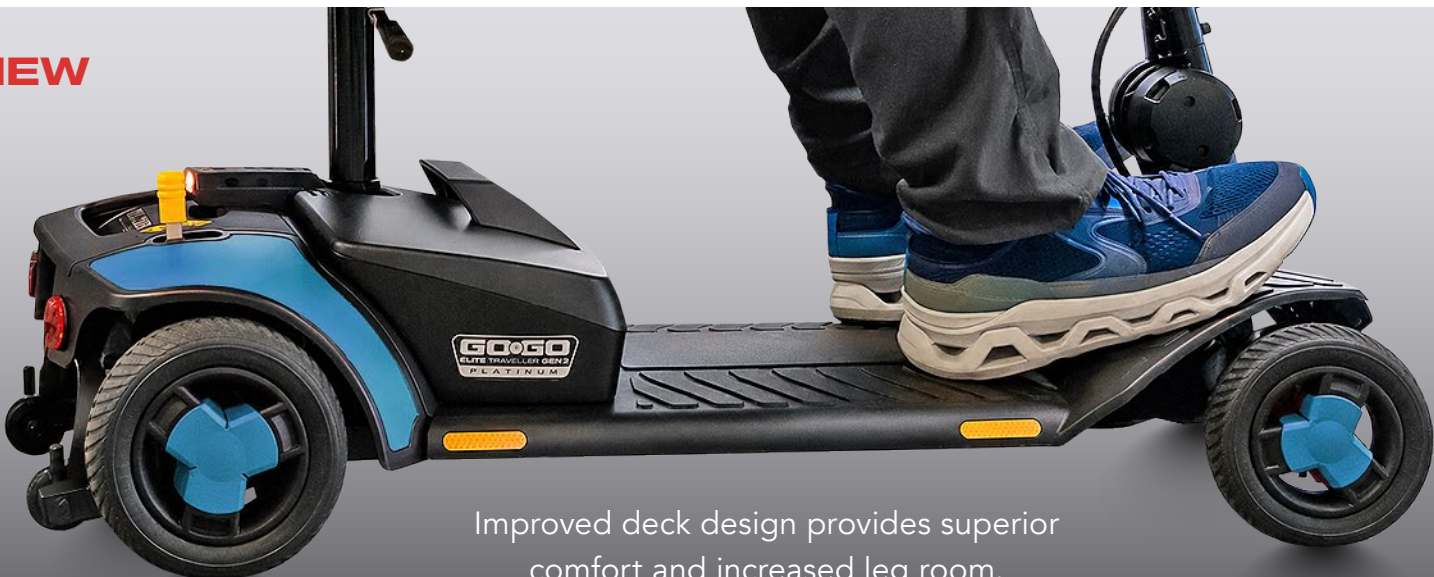

Shown in Iceberg Blue (optional)

FDA Class II Medical Device

Our Platinum model is proudly
MADE IN USA
from foreign & domestic parts

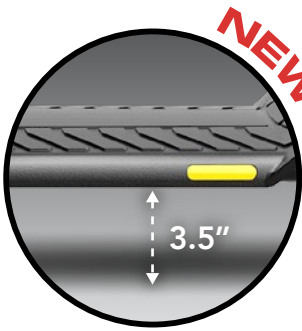

Both models feature a newly revamped deck designed to provide increased leg room, more pass-through space, and superior comfort. Users have added flexibility in how they position their legs, with the option to rest their feet on the flat deck surface or along the sloped area near the front wheels.

NEW

Improved deck design provides superior comfort and increased leg room.

The Go Go Elite Traveller® Gen 3 delivers an impressive combination of comfort, functionality, and travel-ready performance, while the Go Go Elite Traveller® Gen 3 Platinum takes the experience even further with additional premium features, including Charge360 magnetic charging, a tiller adjustment foot pedal, and Made in America distinction.

NEW

Ground clearance of 3.5 inches

NEW

Color-matched hubcaps and nose shroud

NEW

Front and rear pathway lights

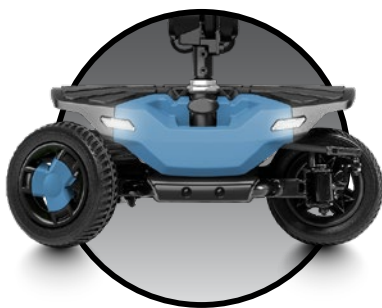

NEW

Large front basket

Feather-touch disassembly

Exclusive, patented, EZ Turn technology

With the launch of these two new Gen 3 models, Go Go® continues to give your customers more ways to choose the travel scooter that best fits their needs. Whether their travels take them near or far, these new products are sure to help them stay active, independent, and connected better than ever before.

Official Launch Dates:
