Scout Transport Cart: Main Features

Scout Transport Cart: Operating Instructions

NOTE: BEFORE USING THE TRANSPORT CART FOR THE FIRST TIME, READ THIS SECTION COMPLETELY AND FAMILIARIZE YOURSELF WITH THE FEATURES OF THE TRANSPORT CART.

STEP 1: Raise the lift to its highest position and rotate the lift so that the cart can roll up behind the lift. The lift forks should be about one foot apart and about 16 inches off the floor. Remove the spring pin from the capture fork. See diagram to the right.

STEP 2: Roll the cart into position until the capture fork is around the mast and the lift brackets are under the lift bar. Replace the spring pin to hold the lift in place. See diagram to the right.

STEP 3: Turn the select knob clockwise to put the cart in "lift" mode. Turn the winch handle clockwise to raise the lift up and out of the anchor. If the lift won't move, shake the mast to loosen it in the anchor and turn the handle until the lift comes out of the anchor. Raise the lift until the stem is an inch or two above the floor. The lift is now ready for transportation. See diagram to the right.
